IIHF Daily Injury Report Form

IIHF Championship: _____

National Association: _____

Date: ____ / ____ / ____ (dd/mm/yy)

Using this form, please report if there were any injuries sustained by any player on your team during the above-mentioned day during this IIHF Championship. We would ask that you also report if there were no injuries sustained by players on your team during this day of this IIHF Championship. If an injury was sustained during this day then an IIHF Injury Report Form must be completed and submitted to the IIHF Medical Supervisor or, in his absence, to the IIHF Directorate Chairman providing the details of the injury sustained.

The definition of an injury used by the IIHF for reporting purposes is as follows:

1. An injury is considered reportable if a player misses a practice or a game because of an injury sustained during a practice or a game
2. The player does not return to the play for the remainder of the game following an injury
3. All concussions
4. All dental injuries
5. Any laceration which requires medical attention
6. All fractures

Please check (✓) the appropriate box below. Please provide the number of injuries sustained if you check article 'A'.

Injury Report	(✓)
A. During this day there were _____ injuries sustained by our team. (number)	
B. During this day there were no injuries sustained by our team	

Team Physician/Medical Representative: _____
(print name)

Br J Sports Med 2014;0:1–7.

-IIHF,

-Analiza poškodb na svetovnih prvenstvih in olimpijskih igrah od l. 2006 – 2011,

-Incidenca posameznih poškodb,

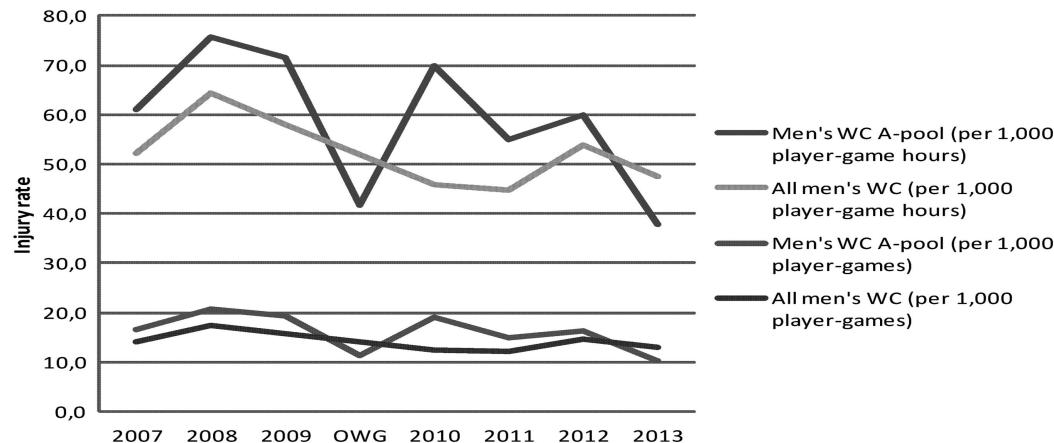

-Mehanizem poškodbe.

Poškodbe pri hokeju

Injuries in men's international ice hockey: a 7-year study of the International Ice Hockey Federation Adult World Championship Tournaments and Olympic Winter Games

Markku Tuominen,¹ Michael J Stuart,² Mark Aubry,³ Pekka Kannus,⁴ Jari Parkkari⁵

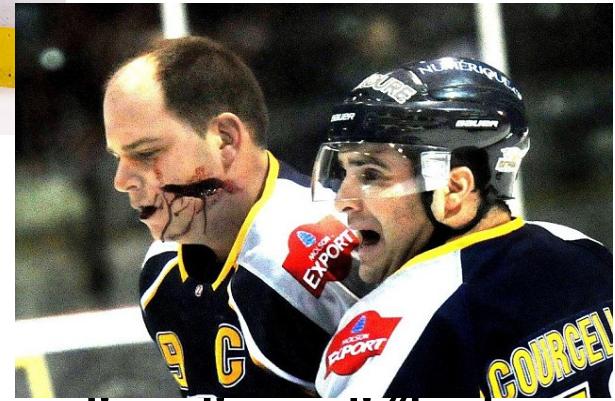

Br J Sports Med 2014;0:1–7.

VERJETNOST, DA SE IGRALEC POŠKODUJE:
1 – 1.2 poškodba na 20 odigranih ur tekme!
1 poškodba na 40 ur treninga

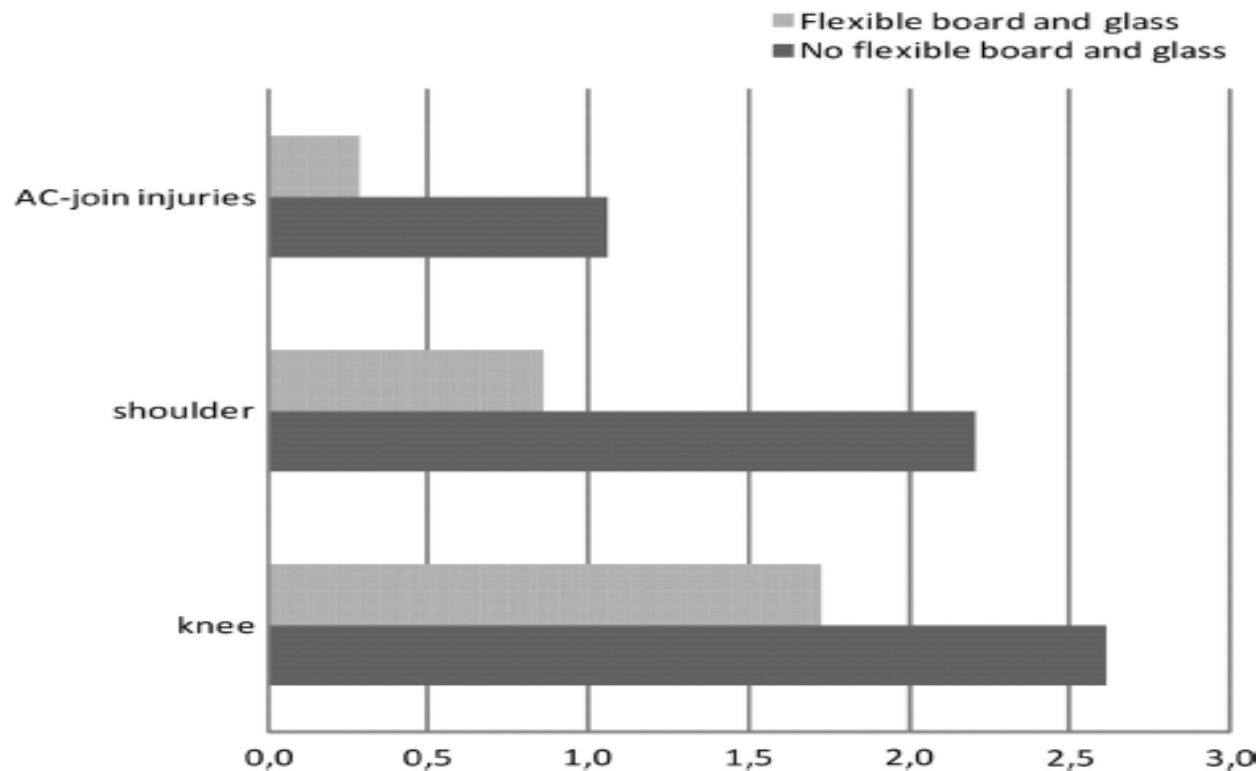

Vzroki za poškodbe pri hokeju

1. Hitrost
2. Ograda
3. Plošček
4. Palica
5. Rezilo drsalke
6. “Body check”

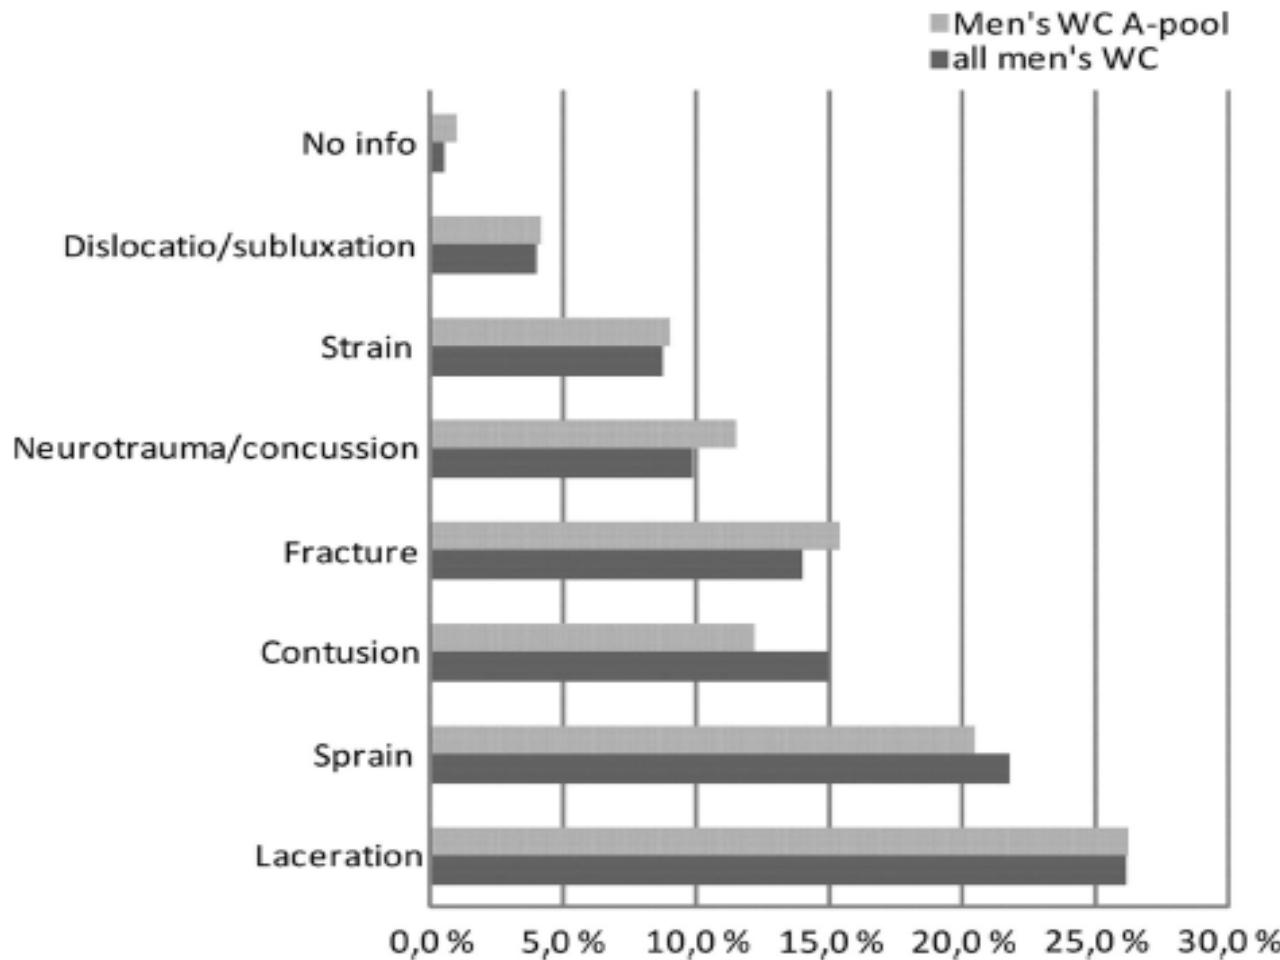

60,7% vseh poškodb zaradi udarca s ploščkom, s palico ali zaradi “body-check-a”.

Število poškodb vs. material ograde

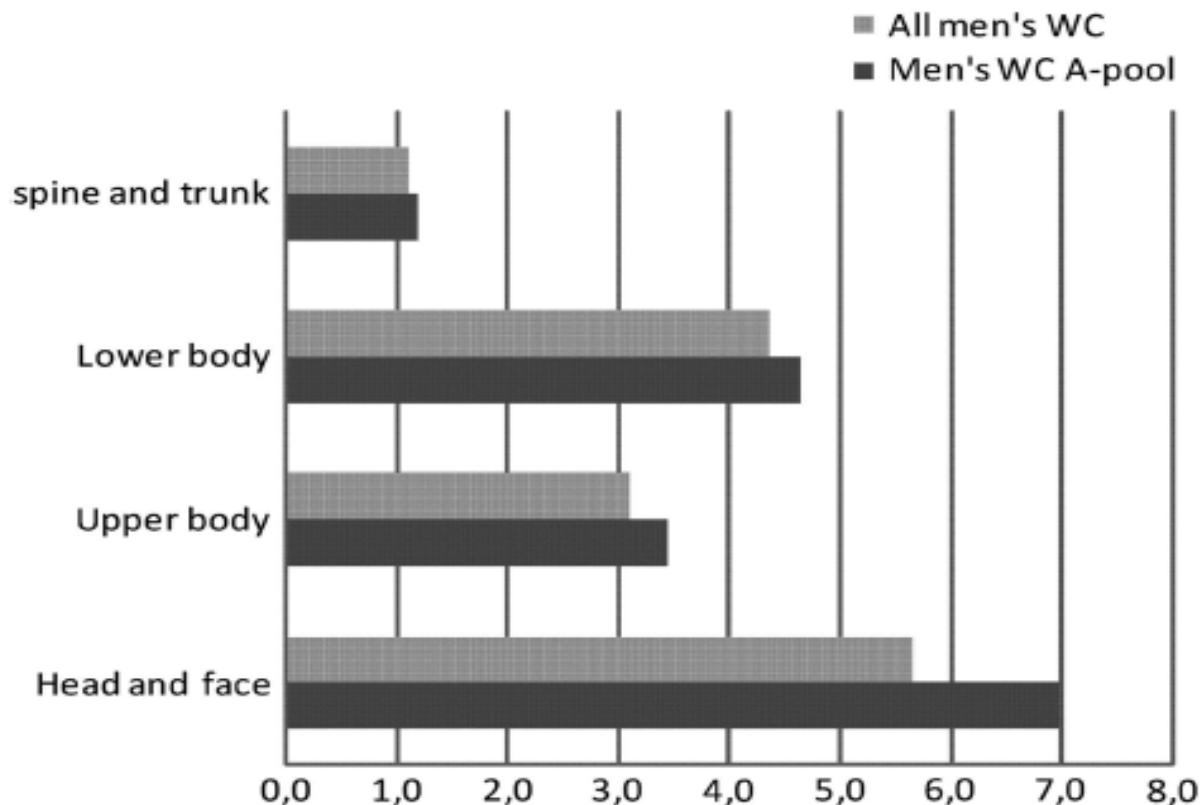

Mehke (fleksibilne) ograde so zmanjšale pojavnost (incidenco) poškodb za 29%!

Tipi poškodb

Poškodovani del telesa

Razlika v poškodbah pri ženskah in moških

Are There Differences in Ice Hockey Injuries Between Sexes?

A Systematic Review

Lauren MacCormick,* BS, Thomas M. Best,^{†‡§} MD, PhD, and David C. Flanigan,^{†‡||¶} MD
Investigation performed at The Ohio State University, Columbus, Ohio, USA

The Orthopaedic Journal of Sports Medicine, 2014

-Ni razlike v pojavnosti poškodb med spoloma

-Moški imajo več poškodb zgornjih udov (izpah ramenskega sklepa!, poškodba AC sklepa!)

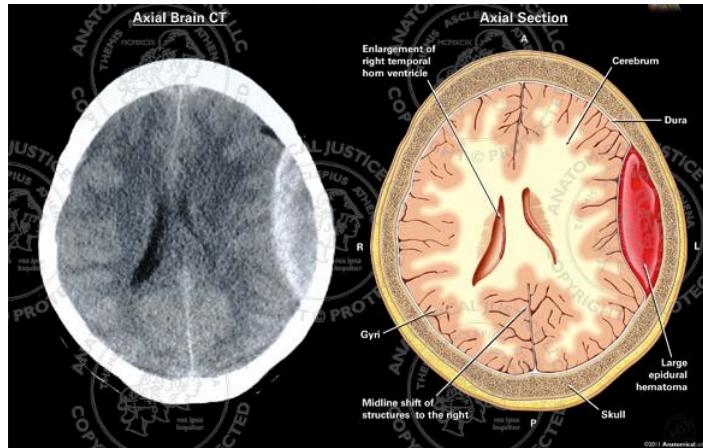

-Ženske imajo več poškodb spodnjih udov (notranja stranska vez!)

Poškodba glave – pretres možganov, nezavest

- Incidenca do 10% vseh poškodb na WC!,
- Večina pretresov se priperi v prvi tretjini (42 – 47%),
- Najbolj izpostavljeni igralni mesto je center (v 25%),

Poškodba glave – pretres možganov, nezavest

Pretres možganov, epiduralni – subduralni hematom, difuzna krvavitev – edem možganov,

Pravilno ukrepanje na ledu: zavarovanje vratne hrbtenice, položaj, sprostitev dihalnih poti, preverjanje življenskih funkcij, postopki oživljanja, varen transport (rešilec),

Opazovanje vsaj 48 ur!

Pogoji za postopno vrnitev na led: ni nevroloških izpadov, lucidno mišljenje, ni glavobola – bruhanja...

Zlom/dislokacija vratnih vretenc

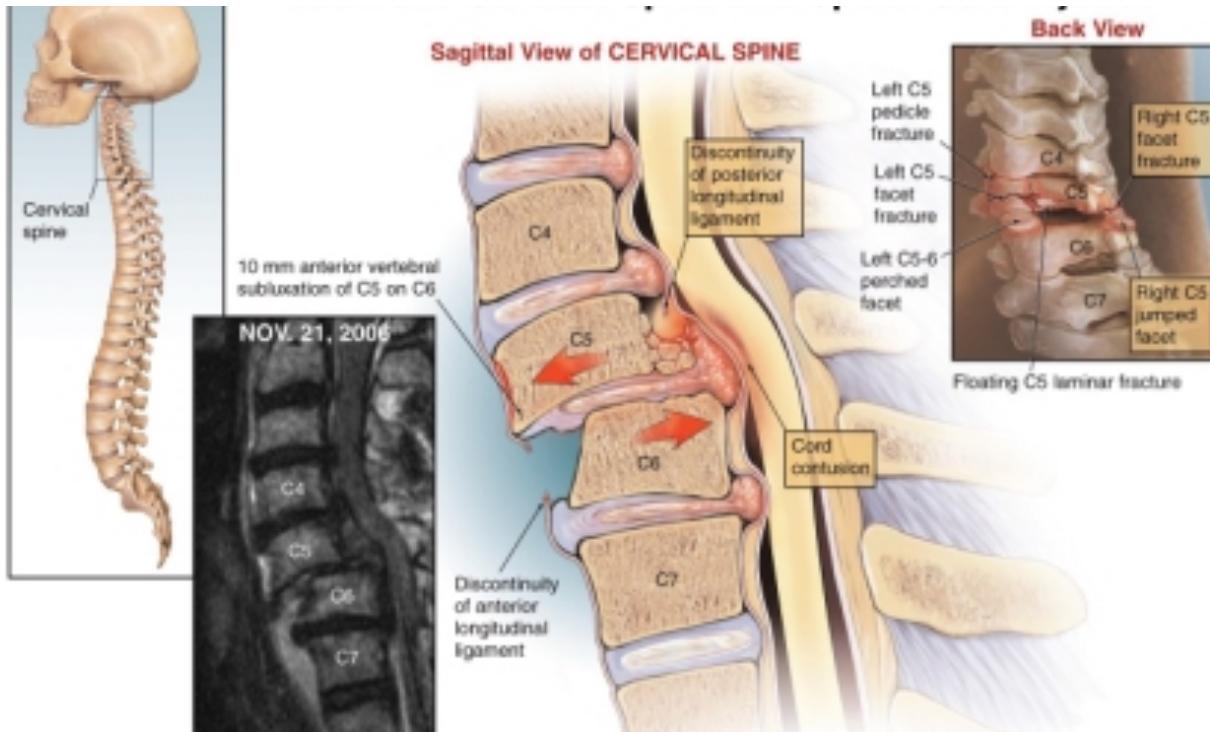

Canadian Ice Hockey Spinal Injuries Registry (data from 1943 to 2011):

- 355 cases documented (cca 10% severe),
- primarily males – 97.7%,
- cervical spine injuries – 78.9%
- impact with the boards – 64.2%, check or push from behind – 36.0%.

It is imperative **to continue educating players and team officials about spinal injury prevention and to reinforce the rules against checking or pushing from behind** to reduce the incidence of these serious injuries.

Zlom/dislokacija vratnih vretenc

Možne posledice zloma vratne hrbtenice:

- Motorične motnje v rokah in nogah!,
- Senzorični izpadi po koži rok, nog in trupa,
- Izguba kontrole uriniranja in odvajanja blata ter motnja spolne funkcije,
- Preležnine, okužbe,...
- Motnje dihanja, smrt (poškodba zgornjih vratnih vretenc).

Zlom/dislokacija vratnih vretenc

Najhujše posledice poškodbe vratnih vretenc so zaradi nepravilne oskrbe takoj po poškodbi, zaradi nepravilne prve pomoči nezavestnega!

Poškodbe obraza

Rane kože in podkožja

Zlom nosu in obnosnih sinusov

Zlomi obraznih kosti

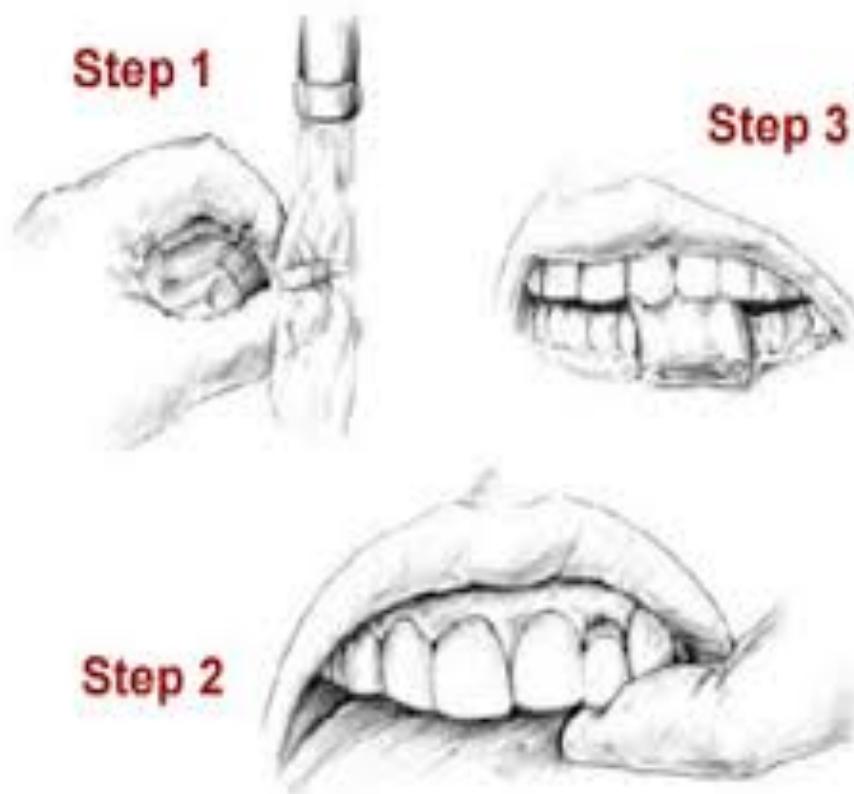

Poškodbe očesa

Prva pomoč: zaustaviti krvavitev, sterilno pokriti, transport v ambulanto (slikanje, šivanje,...)

Cepljenje proti tetanusu in antibiotik!

Poškodbe zob

Izpah rame

Tveganje za ponovni izpah je odvisno od starosti

- ❖ Mladi pod 20 leti - preko 90%
- ❖ Starejši od 40 let - pod 10%

Izpah rame

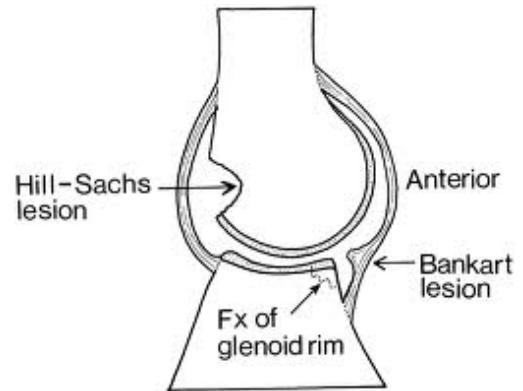

- Bankartova lezija labruma!
- kostna Bankartova lezija
- Hill Sachsova lezija!

Zlomi

glenoida
 korakoida
 humeralne glave
 grčevin humerusa

Raztrganina mišic rotatorne manšeta (starejši)

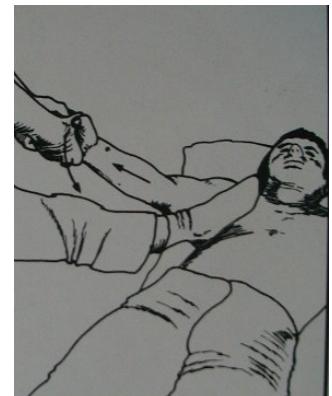

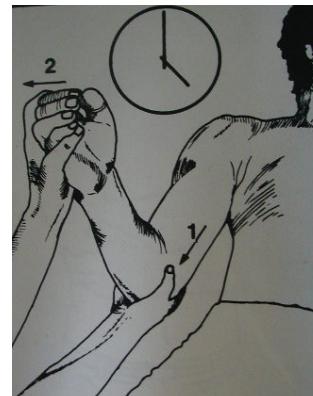

Poškodba aksilarnega živca

Izpah rame

Prva pomoč
imobilizacija in čimprejšnji prevoz na urgenco
(RTG!)

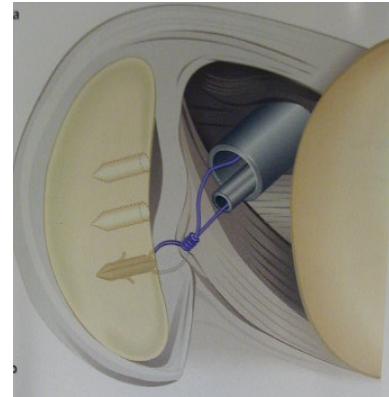

Repozicija
– Kocherjev manever
– Hipokratov manever

Imobilizacija 4-6 tednov v zunanji rotaciji!

Izpah rame

Operacija, če se izpah ponavlja!

Artroskopska Bankartova operacija

Odprta stabilizacija (HOKEJ!)

- Bristow - Latarjet operacija

Rehabilitacija min. 4 mesece

AC sindezmoliza

ZDRAVLJENJE:

...izberemo glede na tip poškodbe, glede na starost in fizične zahteve poškodovanca

- poškodbe tipa I in II zdravimo neoperativno,
- poškodbo tipa III lahko zdravimo konzervativno ali operativno
 - pri visoko aktivnih bolnikih in pri mlajših ženskah, da preprečimo deformacijo zaradi vertikalnega premika ključnice
- poškodbe tipa IV – VI zdravimo operativno

AC sindezmoliza

KONZERVATIVNO ZDRAVLJENJE

akromioklavikularna (AC) opornica, mitela le pri očitnem tipu I,
analgetik, hlajenje

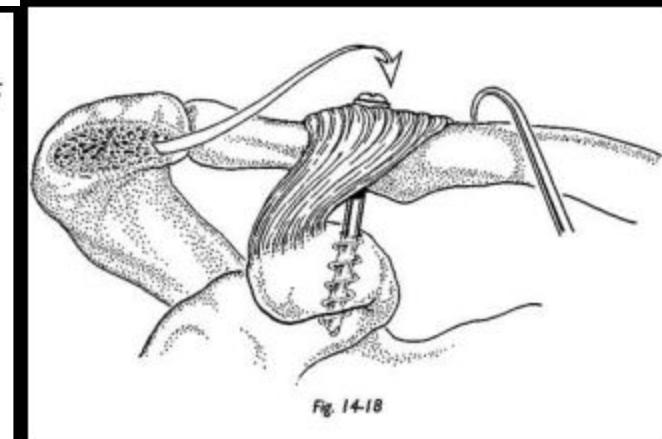

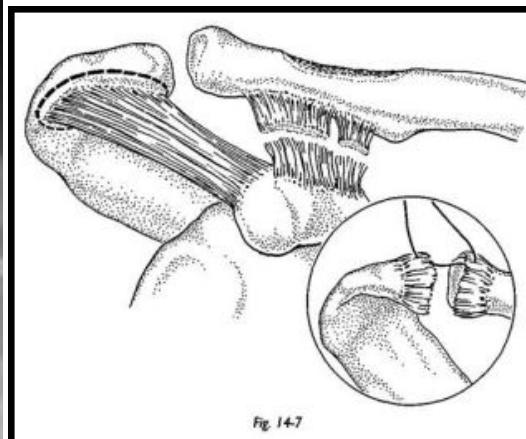

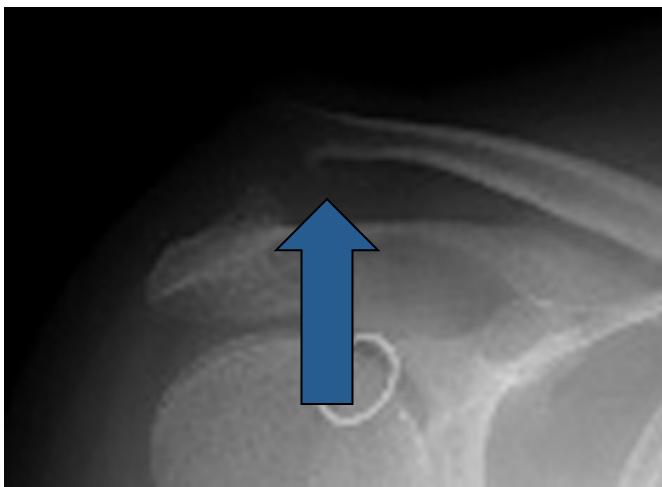

- AC ortoza (tip II in III?)

AC sindezmoliza

OPERATIVNO ZDRAVLJENJE

- poškodbe tipa III – VI
- preko 30 načinov OP zdravljenja popolne dislokacije AC-sklepa
- operativni poseg najbolje opraviti čimprej po poškodbi (lahko kasneje)

Poškodba medialne kolateralne vezi kolena

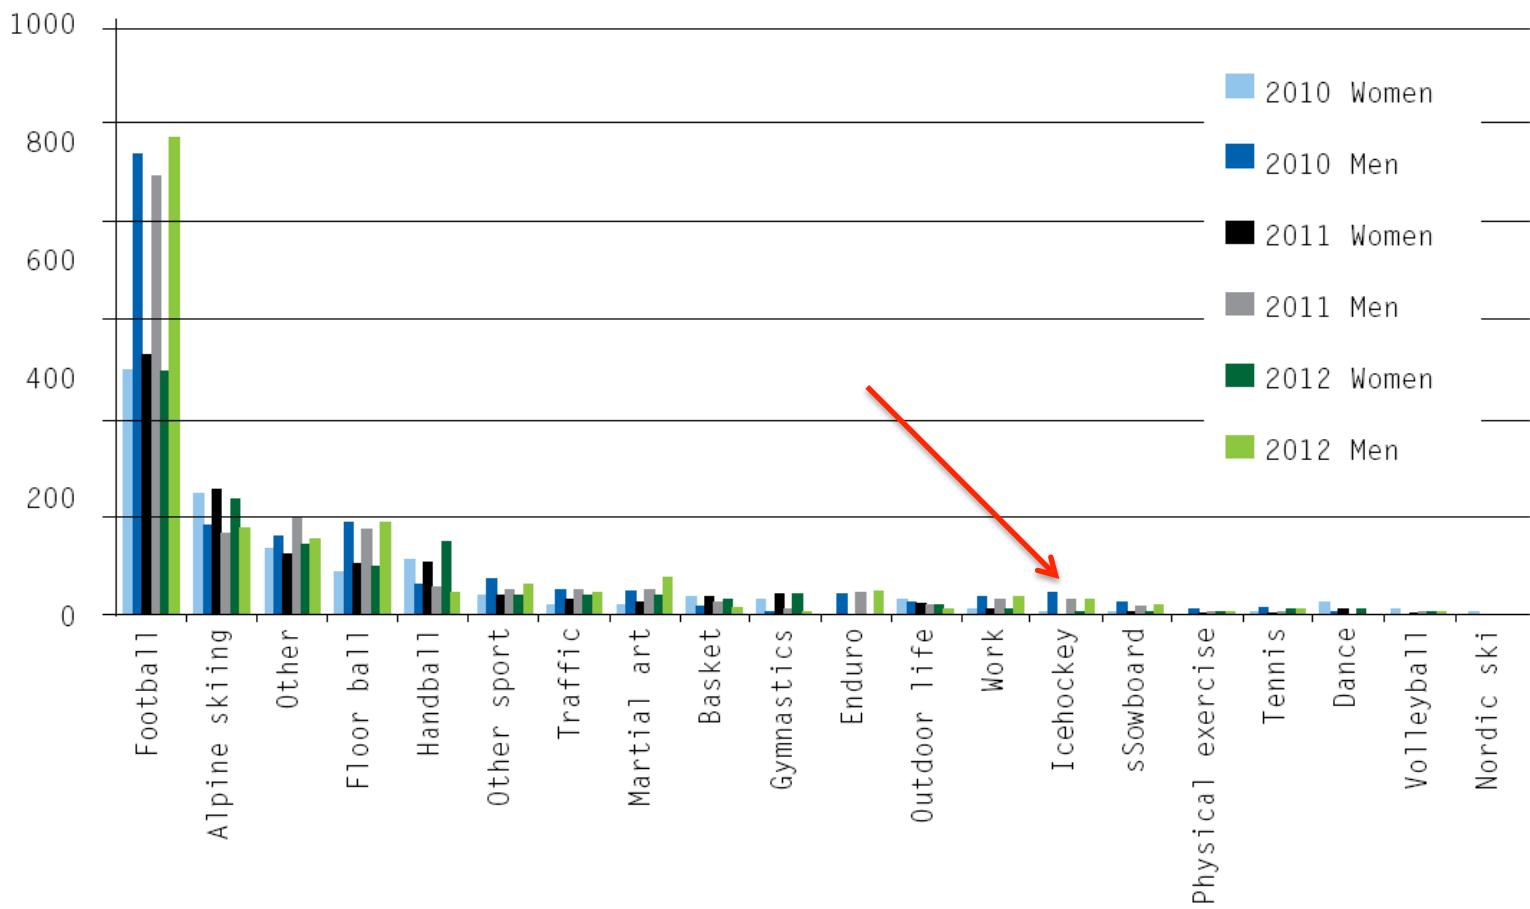

Zdravljenje:

- praviloma konzervativno (brez operacije)
- 2 – 12 tednov odvisno od stopnje poškodbe
- opornica

Poškodba sprednje križne vezi kolena

Number of primary ACL reconstructions, injury caused by sports

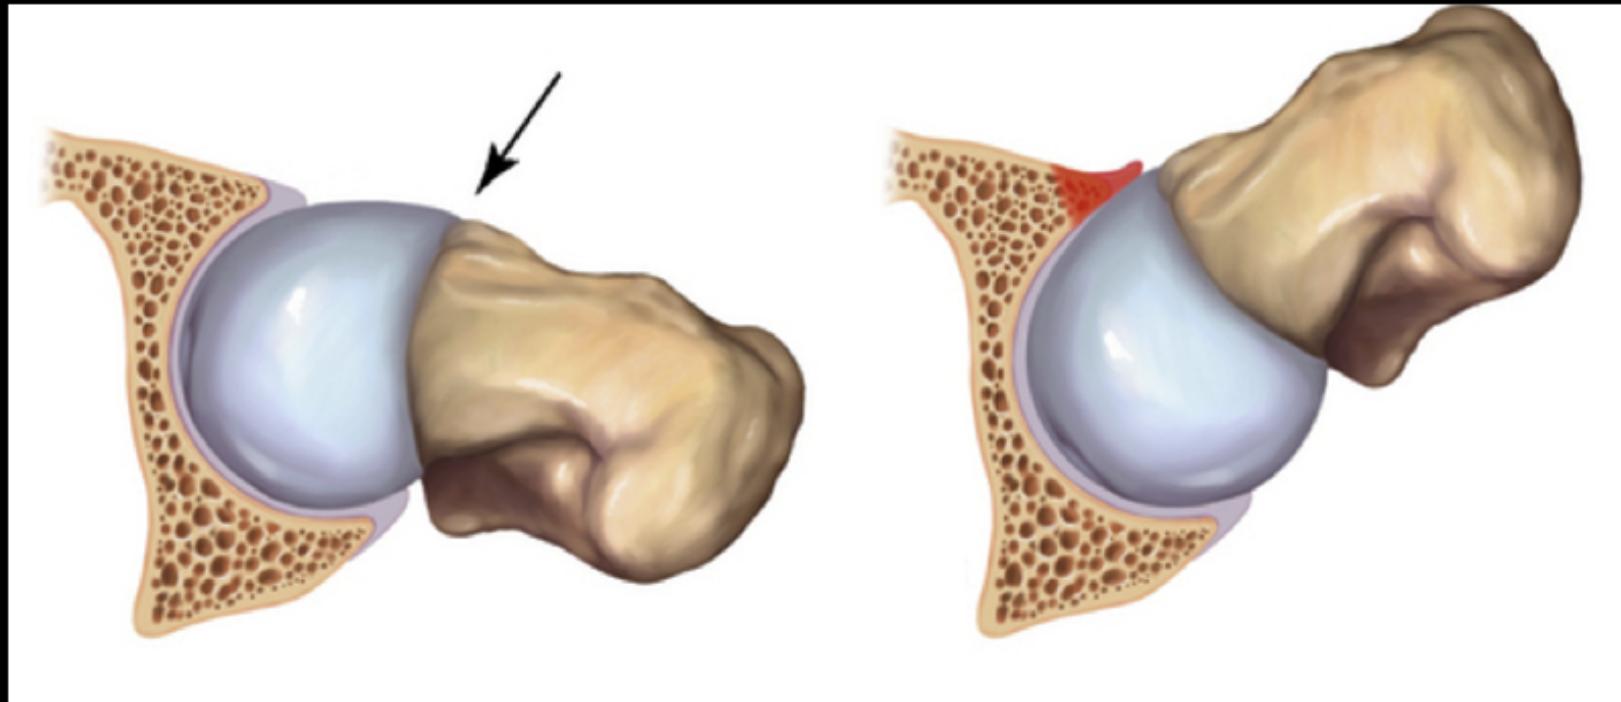

Preobremenitvena poškodba

Preobremenitvena poškodba

Preobremenitvena poškodba - asferična oblika glavice stegnenice

Utesnitveni sindrom kolka: poškodba labruma in hrustanca, obraba
